Dear Shareholder

On behalf of the directors of PepinNini Minerals Limited (Company), I am pleased to invite you to participate in a pro rata non-renounceable rights issue on the basis of two (2) New Shares for every three (3) Shares held by Shareholders on the Record Date at an issue price of \$0.019 per New Share to raise, before costs, \$1,525,536 (Offer).

As an endorsement of our commitment to the Company, my fellow Directors Rebecca Holland-Kennedy and Robert Wei Sun intend to participate in the Offer and I have underwritten a portion of New Shares in the event of a shortfall.

Yours faithfully,

Further, Rebecca Holland-Kennedy holds 18,923,549 Options. The exercise by Rebecca Holland-Kennedy of Options to Shares is subject to section 606 of the Corporations Act which, subject to certain exceptions, prohibits acquisitions of a relevant interest in Shares in a company which would increase the acquirer's voting power between 20% and 90%. Rebecca Holland-Kennedy has advised that she and her associates do not intend to exercise any Options prior to the Record Date.

1.7 **Opening and Closing Dates**

The Rights Issue will open for receipt of acceptances on the Opening Date and closes on the Closing Date. The Directors reserve the right to vary the dates of the Offer, including extending the Closing Date subject to the Corporations Act, ASX Listing Rules or other applicable laws. Investors are therefore urged to lodge their Entitlement and Acceptance Forms as soon as possible.

1.8 **Rights Trading**

The Rights to the New Shares are non-renounceable, which means that Rights will not be traded.

1.9 **Acceptances**

⁴ This assumes that in each scenario, Rebecca Holland-Kennedy and her associates participate to the full extent of their Entitlement to New Shares under the Offer. It should be noted that Rebecca Holland-Kennedy and her associates will not participate in any Shortfall Offer. It is further noted Rebecca Holland-Kennedy has advised that she and her associates do not intend to acquire any additional Shares prior to the Record Date.

Shareholders may accept all or part of their Entitlement.

Instructions for completion are set out on the accompanying Entitlement and Acceptance Form. Acceptance must not exceed your Entitlement as shown on that form.

1.10 **ASX Listing**

Application will be made within seven days after the date of the Prospectus for the New Shares offered under this Prospectus to be granted official quotation by the ASX. The granting by ASX for the official quotation of the New Shares is not guaranteed.

If application for admission of the New Shares to quotation is not made within seven days or the New Shares are not admitted to quotation on the ASX within 3 months after the date of this Prospectus, none of the New Shares offered under this Prospectus will be issued and allotted and all application monies will be refunded.

The ASX takes no responsibility for the contents of this Prospectus.

1.11 **Rights attaching to Shares**

All New Shares issued under the Offer rank in all respects on equal terms with the existing Shares. Full details of the rights attaching to Shares are set out in the Company's constitution, a copy of which may be inspected at the Company's registered office. A summary of the rights follows.

Voting rights

At a general meeting every shareholder present in person or by proxy, attorney or representative has one vote on a show of hands and every shareholder present in person or by proxy, attorney or representative has one vote for each Share on a poll.

Dividends

Dividends are declared by the Directors at their discretion and subject to any special rights (at present there are none) are payable on all Shares in proportion to the amount of capital for the time being paid up but not credited as paid up on those Shares.

Transfer of Shares

Generally, Shares are freely transferable. Where the Listing Rules or the law require the Company to do so, the Directors must decline to register a transfer. If Shares are subject to a restriction agreement entered into by the Company and Shareholder, except as permitted by the Listing Rules, a Shareholder may not dispose of the Shares and the Directors and the Company will not register a dealing in the Shares.

Future increases in capital

The allotment or issue of any Shares of the Company is under the control of the Directors who may, subject to the Corporations Act and the Listing Rules, allot or otherwise dispose of them on such conditions as they see fit.

Variation of rights

The rights and privileges attaching to Shares can be altered with the consent in writing of Shareholders with at least 75% of the votes in that class or by special resolution of the Shareholders. A special resolution is a resolution passed by a majority of not less than 75% of those present and voting.

Rights on winding up

In the event of a winding up of the Company the liquidator may divide among all or any of the Shareholders as the liquidator thinks fit in specie or in kind any part of the assets of the Company, and may vest any part of the assets of the Company in trustees upon trust for the benefit of all or any of the Shareholders as the liquidator thinks fit.

1.12 Effect of the Rights Issue on Optionholders

The Company currently has 41,158,105 Options on issue.

Optionholders may participate in the Rights Issue by exercising any or all of these Options before the Record Date. The exercise of any Options prior to the Record Date will increase the issued capital of the Company and may increase the number of New Shares issued under the Rights Issue and the total amount raised under the Rights Issue.

Optionholders cannot participate in the Rights Issue without exercising their Options.

1.13 Minimum Capital Raising

There is no minimum amount of capital to be raised under the Rights Issue.

1.14 Shortfall in subscription

The Directors reserve the right to issue any shortfall in subscription for New Shares at their discretion within 3 months after the close of the Offer (**Shortfall Offer**). Offers of shortfall are made as a separate offer under this Prospectus. Should the Directors decide to issue any shortfall, the Shortfall Offer will remain open after the Closing Date. The issue price for each New Share to be issued under the Shortfall Offer is \$0.019 (1.9 cents).

1.15 Overseas Shareholders

This Offer is only being extended to Shareholders with registered addresses in Australia and New Zealand. All other Shareholders (**Non-Resident Shareholders**) will not be offered Rights under this Prospectus. The Company has determined, in accordance with the Listing Rules, that it would be unreasonable to make an offer under this Prospectus to Non-Resident Shareholders having regard to:

- the number of Shareholders in the places where the offer would be made;
- the number and value of the Rights that would be offered; and
- the cost of complying with the legal requirements in those places.

No Entitlement and Acceptance Forms are being sent to Non-Resident Shareholders.

Neither this Prospectus nor the Entitlement and Acceptance Form constitute an offer of, or an invitation by or on behalf of the Company to subscribe for or purchase any of the New Shares in any jurisdiction or to any person to whom it is unlawful to make such an offer or invitation. The distribution of this Prospectus and Entitlement and Acceptance Form, and the offering of New Shares, in certain jurisdictions may be restricted by law. Persons into whose possession such documents come should inform themselves about and comply with those restrictions.

Shareholders should note that as this Offer is non-renounceable and extended to Shareholders with registered addresses in Australia and New Zealand only, the nominee procedure in respect of foreign holders in section 615 of the *Corporations Act* will not be implemented for the benefit of the very small number of Non-Resident Shareholders on the Company's register.

1.16 Taxation

Shareholders should be aware that there are taxation implications for subscribing for New Shares. These taxation implications will vary between different Shareholders and Shareholders should consult their own professional tax adviser in relation to the taxation implications.

2. How to Apply

2.1 What you may do

The number of New Shares to which you are entitled is shown in the accompanying Entitlement and Acceptance Form. You may:

Please note that should you choose to pay by BPAY, you do not need to submit the Entitlement and Acceptance Form. Your BPAY payment must be received by 5:00pm (AEST) on the Closing Date. You should be aware that your financial institution may implement earlier cut-off times with respect to electronic payment and you should take this into account when making payment.

2.3 **Applying for Additional New Shares**

If a Shareholder wishes to take up any New Shares offered on the basis of this Prospectus which are not taken up by other Shareholders (**Additional New Shares**), Shareholders must, in addition to completing the portion of their Entitlement and Acceptance Form which relates to their Entitlement, complete the portion of the Form relating to the Additional New Shares they wish to take up.

The number of Additional New Shares available will depend on the level of acceptance of Entitlements by Eligible Shareholders and whether the Directors decide to issue the shortfall. Accordingly you may not receive the full amount or any of the Additional New Shares for which you have applied. Additional New Shares, if available, will be issued under the Shortfall Offer.

2.4 **Other Investors**

Investors in Australia and New Zealand other than Shareholders that wish to take up any New Shares offered on the basis of this Prospectus not taken up by Shareholders must complete a Shortfall Application Form.

The number of New Shares available will depend on the level of acceptance of Entitlements by Eligible Shareholders, number of Additional New Shares they wish to take up and whether the Directors decide to issue the shortfall.

Shortfall Application Forms will be provided to investors on request. Refer to the Shortfall Application Form for instructions on its completion.

2.5 **Entitlements not taken up**

If you decide to take up only part of your Entitlement or not to accept any of your Entitlement, your Entitlement will lapse to that extent and may be placed by the Directors within 3 months after the close of the Offer under the Shortfall Offer.

4. Risks

Activities in the Company and its controlled entities, as in any business, are subject to risks, which may impact on the Company's future performance. The Company and its controlled entities have implemented appropriate strategies, actions, systems and safeguards for known risks, however, some are outside its control.

The Directors consider that the following summary, which is not exhaustive, represents some of the major risk factors which Shareholders need to be aware of in evaluating the Company's business and risks of increasing your investment in the Company. Shareholders should carefully consider the following factors in addition to the other information presented in this Prospectus.

The principal risks include, but are not limited to, the following:

4.1 Company specific risks

(a) Exploration costs

The exploration costs of the Company are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainties and, accordingly, the actual costs may materially differ from these estimates and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability.

(b) Exploration success

The Tenements are at various stages of exploration, and potential investors should understand that mineral exploration and development are high-risk undertakings.

There can be no assurance that exploration of the Tenements, or any other licenses that may be acquired in the future, will result in the discovery of an economic ore deposit. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited.

(c) Agreements with third parties

The Company has signed various agreements with a number of third parties. There is a risk of financial failure or default by the third party to these arrangements. Any breach or failure may lead to penalties or termination of the relevant contract. In addition, our interest in the relevant subject matter (tenement, for example) may be jeopardised.

(d) Risks associated with operating in Argentina

Some of the Company's key assets are its contractual interests in Tenements in Argentina. The Company's properties in Argentina may be subject to the effects of political changes, war and civil conflict, hyperinflation, currency non-convertibility or instability and changes of

law affecting foreign ownership, government participation, taxation, working conditions, rates of exchange, exchange control, exploration licensing, export duties, repatriation of income or return of capital, environmental protection, mine safety, labour relations as well as government control over mineral properties or government regulations that require the employment of local staff or contractors or require other benefits to be provided to local residents.

These changes may impact the profitability and viability of the Company's Tenements. The effect of unrest and instability on political, social or economic conditions in Argentina could result in the impairment of exploration, development and mining operations and the Company's legal title to its mineral Tenements. Any such changes are beyond the control of the Company and may adversely affect its business.

4.2 Industry specific risks

(a) Exploration

The future exploration activities of the Company may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns, unanticipated operational and technical difficulties, industrial and environmental accidents, native title process, changing government regulations and many other factors beyond the control of the Company.

The success of the Company will also depend upon the Company having access to sufficient development capital, being able to maintain title to its Tenements and obtaining all required approvals for its activities. In the event that exploration programmes prove to be unsuccessful this could lead to a diminution in the value of the Tenements, and possible relinquishment of the Tenements.

(b) Native title and Aboriginal Heritage

In relation to Tenements which the Company has an interest in or will in the future acquire such an interest, there may be areas over which legitimate common law native title rights of Aboriginal Australians exist. If native title rights do exist, the ability of the Company to gain access to Tenements (through obtaining consent of any relevant landowner), or to progress from the exploration phase to the development and mining phases of operations may be adversely affected.

Further to this, it is possible that an Indigenous Land Use Agreement (ILUA) may be registered against one or more of the Tenements in which the Company has an interest. The terms and conditions of any such ILUA may be unfavourable for, or restrictive against, the Company.

The Directors will closely monitor the potential effect of native title claims involving Tenements in which the Company has or may have an interest.

(c) Operations

The operations of the Company may be affected by various factors, including failure to locate or identify mineral deposits, failure to achieve predicted grades in exploration and mining, operational and technical difficulties encountered in mining, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

No assurances can be given that the Company will achieve commercial viability through the successful exploration and/or mining of its Tenement interests. Until the Company is able to realise value from its projects, it is likely to incur ongoing operating losses.

(d) Resource estimates

Resources on Tenements in which the Company has an interest have been prepared in accordance with the 2004 JORC Code. An estimate is an expression of judgement based on knowledge, experience and industry practice. Estimates which were valid when originally calculated may alter significantly when new information or techniques become available. In addition, by their very nature, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. As further information becomes available through additional fieldwork and analysis, the estimates are likely to change. This may result in alterations to development and mining plans which may, in turn, adversely affect the Company's operations.

4.3 General risks

(a) Additional requirements for capital

Additional funding is likely to be required in the future to effectively implement the Company's business and operations plans, take advantage of opportunities for acquisitions, joint ventures or other business opportunities, and to meet any unanticipated liabilities or expenses which the Company may incur.

The Company may seek to raise further funds through equity or debt financing, joint ventures, production sharing arrangements or other means. Failure to obtain sufficient financing for the Company's activities and future projects may result in delay and indefinite postponement of exploration, development or production on the Company's properties or even loss of a property interest. There can

be no assurance that additional finance will be available when needed or, if available, the terms of the financing might not be favourable to the Company and might involve substantial dilution to Shareholders.

(b) Commodity price and exchange rate fluctuations

If the Company achieves success leading to mineral production, the revenue it will derive through the sale of commodities exposes the potential income of the Company to commodity price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations, technological advancements, forward selling activities and other macro-economic factors.

Furthermore, international prices of various commodities are denominated in United States dollars, whereas the income and expenditure of the Company are and will be taken into account in Australian currency, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and Australian dollar as determined in international markets.

(c) Competition risk

The industry in which the Company is involved is subject to domestic and global competition. Although the Company will undertake all reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the activities or actions of its competitors, which activities or actions may, positively or negatively, affect the operating and financial performance of the Company's projects and business.

(d) General equity market risk

The value of the Company's Shares, including New Shares to be issued under the Offer may fluctuate. In recent times, the extent of the volatility in the price of the Company's Shares and the wider market has been significant.

Investments in equity markets are generally speculative in nature and potential investors should carefully consider this risk before making any investment in Shares.

There is no guarantee that the Shares will trade at or above the issue price for New Shares pursuant to the Offer. Potential investors should also note that past performance of the Shares on ASX provides no guidance as to the future performance of these Shares on ASX.

Many factors will affect the price of securities including local and international stock markets, movements in interest rates, economic conditions and investor sentiment generally. In addition, the commencement of, or escalation in, any war, armed conflict, hostilities

between nations, civil unrest or terrorist activities may affect the price of securities.

(e) Economic factors

Changes in the general economic climate in which the Company operates may adversely affect the financial performance of the Company. Factors that may contribute to that general economic climate include the level of direct and indirect competition against the Company, industrial disruption in Australia, the rate of growth of Australia's gross domestic product, interest rates and the rate of inflation.

(f) Force Majeure

The Company's projects now or in the future may be adversely affected by risks outside the control of the Company including labour unrest, civil disorder, war, subversive activities or sabotage, fires, floods, explosions or other catastrophes, epidemics or quarantine restrictions.

(g) Government policy changes

Adverse changes in government policies or legislation may affect ownership of mineral interests, taxation, royalties, land access, labour relations, and mining and exploration activities of the Company. It is possible that the current system of exploration and mine permitting in Western Australia, South Australia or Queensland may change, resulting in impairment of rights and possibly expropriation of the Company's properties without adequate compensation.

(h) Regulatory risks

The Company's exploration and development activities are subject to extensive laws and regulations relating to numerous matters including resource licence consent, conditions including environmental compliance and rehabilitation, taxation, employee relations, health and worker safety, waste disposal, protection of the environment, native title and heritage matters, protection of endangered and protected species and other matters. The Company requires permits from regulatory authorities to authorise the Company's operations. These permits relate to exploration, development, production and rehabilitation activities.

Obtaining necessary permits can be a time consuming process and there is a risk that the Company will not obtain these permits on acceptable terms, in a timely manner or at all. The costs and delays associated with obtaining necessary permits and complying with these permits and applicable laws and regulations could materially delay or restrict the Company from proceeding with the development of a project or the operation or development of a mine. Any failure to

comply with applicable laws and regulations or permits, even if inadvertent, could result in material fines, penalties or other liabilities. In extreme cases, failure could result in suspension of the Company's activities or forfeiture of one or more of the Tenements.

(i) Reliance on key personnel

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.

(j) Risk of international operations generally

International sales and operations are subject to a number of risks, including:

- (a) potential difficulties in enforcing agreements (including joint venture agreements) and collecting receivables through foreign local systems;
- (b) potential difficulties in protecting intellectual property;
- (c) increases in costs for transportation and shipping; and
- (d) restrictive governmental actions, such as imposition of trade quotas, tariffs and other taxes.

Any of these factors could materially and adversely affect the Company's business, results of operations and financial condition.
